

This Week In Space

22 July 2023, Thursday

LUNAR RENDEZVOUS

The Moon is about to have a steamy affair with Venus and Mars, creating a captivating cosmic show to close off the month.

Grab your binoculars or just use your naked eye, and witness the Moon and Venus coming close to $3^{\circ}41'$ separation.

Then, an hour later, the Moon will rendezvous with Mars, passing only $3^{\circ}47'$ away from the red planet. It may be faint, but still visible with the naked eye.

Time:

- Moon & Venus : 6:17PM
- Moon & Mars: 7:39 PM

Location:

- Look up to the sky!
